REFERENCES

The Mercantile Agencies, City Bank of Hartford, Postmaster and Town Officers of Cromwell; and Our Customers throughout the United States. They have steadily increased during the last seventeen years. There is hardly a town in Connecticut where our trees and plants are not growing. You can surely find a patron of ours among your friends.

CROMWELL is located on the Connecticut River and is geographically the very center of the State. Our Farms are two and one-half miles directly north of Cromwell Station, on the Valley Branch, Hartford Division of the N. Y., N. H. & H. R. R.

To Our Patrons

We shall continue our policy of pushing tested varieties of fruits and ornamental stock at fair prices, rather than trying to force untried novelties *because the margin of profit is greater.*

We grow the best stock possible: the only stock which is fit to buy and set. *Buy your cutts elsewhere; ours are in ashes!*

We describe varieties as they behave with us in our fields and orchards. Our experience as commercial growers is always at your service. If we cannot answer your questions we will be frank enough to say, "We don't know."

Our Catalogue may not be as brilliant in the wit of its text, as gay in its coloring, as lengthy in its descriptions, or as large as those many competitors put forth, but we defy any one to find a dishonest statement, either within or on its covers.

We would be pleased to have our customers examine our stock before buying, when possible. THE STATE INSPECTOR'S CERTIFICATE of freedom from disease is attached to all shipments.

We guarantee all goods true to label, and will hold ourselves responsible to the full price of goods should it prove otherwise. WE EMPLOY ONLY INTELLIGENT HELP, who can read and talk United States. If we did not we could not make the above guaranty.

A Premium on Early Orders.—It will be a great help to us to have our orders in early, and although our prices are so low that we cannot offer very great inducements, we have decided to allow OUR CUSTOMERS, WHOSE ORDERS (with remittance) ARE RECEIVED PRIOR TO MARCH 10 to select 5 PER CENT ADDITIONAL STOCK FREE.

No Substitution.—When we cannot supply the variety ordered, we will refund the money, unless requested to substitute some other variety.

At prices named, goods are carefully packed in moss and straw, well baled or boxed, and delivered to forwarders, after which our responsibility ceases, except for errors in filling, which *must be reported within 5 days after receipt of goods, to admit of adjustment.*

Orders amounting to \$10 will be delivered at any freight station in Connecticut without additional expense. Special figures on large orders. **TERMS CASH.**

How far do we ship? Just as far as as we have orders to go. But the farther you live from us the earlier you should have your goods shipped, as after growth begins plants should not be out of the ground any longer than possible.

Plants are shipped same day they are dug. Any one who has had any experience in setting plants knows what an advantage this is.

Six plants at dozen rates, 50 at 100 rates, and 500 at 1,000 rates. Berry plants mailed free at dozen rates. All large orders by express or freight at purchaser's expense.

Note especially that the prices of Strawberry plants do not apply during July, August and September. The digging of plants at this season is much more expensive, and means the destruction of innumerable young plants. During the summer we positively cannot afford to dig into our beds for any such prices. Summer price-list on application.

STRAWBERRIES

(P.) denotes pistillate varieties; (B.) bi-sexual or perfect-flowering

Arnaut. (B.) Similar to Parker Earle, of which it is said to be a seedling. Even more productive than its parent, and much healthier. 25 cts. per doz., 75 cts. per 100, \$4 per 1,000.

Bismarck Strawberry.

Bismarck. (B.) A seedling of Bubach. Plant much stronger, healthier and more productive. Fruit about same size as its parent, but much firmer, more regular in form and uniform in size. We consider it our very best market variety, and advise our customers to give it a trial, both for market and home use. Quality very good. Midseason. 25 cts. per doz., 50 cts. per 100 \$3 per 1,000.

Brandywine. (B.) A very promising variety, which has been quite generally tested and has given almost universal satisfaction. Plant vigorous, large, healthy, hardy and productive. Berries

large, late, roundish conical, regular, uniform in size, handsome in color, and excellent in quality. Popular for home use or market. 25 cts. per doz., 50 cts. per 100, \$3 per 1,000.

Bubach. (P.) This is a beautiful, large and productive early variety. No other variety as large is so early and productive. Too soft for long shipment, but is a fine variety for near markets. While a vigorous grower and a remarkably robust and healthy plant, it makes but few runners, and, consequently, those who offer true stock must ask a higher price than for other well-known varieties. 25 cts. per doz., 60 cts. per 100, \$4 per 1,000.

Clyde. (B.) Very vigorous grower and exceedingly strong plant. A prodigious bearer of good-sized, sweetish berries that will sell

Clyde Strawberry.

readily if not too light-colored and soft, a fault which we fear when the plant is grown in heavily matted rows on light soil. 25 cts. per doz., 50 cts. per 100, \$3 per 1,000.

Excelsior. (B.) Plant healthy; berry dark color, fair size and early. Not fruited here. 25c. per doz., 50c. per 100, \$3 per 1,000.

Glen Mary. (B.) A fine, large, late berry of excellent quality, good color and shape, and quite productive. Last season this variety took top price over all competitors of its season. 25 cts. per doz., 50 cts. per 100, \$3 per 1,000.

Haverland. (P.) This variety is unsurpassed in productive-ness. Fruit large, long and attractive. Plant vigorous; berries light in color and poor in quality. 25 cts. per doz., 50 cts. per 100, \$3 per 1,000.

Hayes. (B.) This is the best fertilizer for Haverland we have tried, being similar in size, shape, and color; not as productive, but of better quality. 25 cts. per doz., 50 cts. per 100, \$3 per 1,000.

Nick Ohmer. (B.) A fine, thrifty plant, producing berries of fine size and appearance. If it proves productive it will be valuable. 25 cts. per doz., 75 cts. per 100, \$4 per 1,000.

Rio Strawberry.

Glen Mary Strawberry.

Ridgeway. (B.) Plant vigorous, healthy and productive. Berry firm, medium size, of good quality, color and form. Its one fault seems to be the readiness with which the hull parts from the berry, always an objection in a market berry. 25 cts. per doz., 75 cts. per 100, \$3.50 per 1,000.

Rio. (B.) Our largest and most productive very early berry. Nothing of its season equals it. Firm, of good color and quality. Profitable for general planting over wide sections of country. 25 cts. per doz., 50 cts. per 100, \$3 per 1,000.

STRAWBERRIES, continued

Sample. (P.) This berry has somewhat exceeded our expectations. If it were not so subject to rust it might prove a fair market berry. Plant a strong grower with fair-sized berries, but a trifle dark in color for our market. 25 cts. per doz., 75 cts. per 100, \$4 per 1,000.

Tennessee Strawberry.

Seaford. (B.) This berry will never become popular in our New England markets. Poor in color and quality, small to medium in size; quite productive. 25 cts. per doz., 50 cts. per 100, \$3 per 1,000.

Sharpless. (B.) This old standard variety maintains its high place in public estimation on account of its large size and splendid market qualities. On strong land it is often very profitable. 25 cts. per doz., 50 cts. per 100, \$3.50 per 1,000.

Star. (B.) A promising berry from Ohio. Plant vigorous and healthy. Berry of good size, form, color and quality. Bids fair to become a standard market berry. 25 cts. per doz., 50 cts. per 100, \$3.50 per 1,000.

Tennessee. (B.) A grand, good berry of Haverland type. Vigorous plant, very productive of exceedingly bright, showy fruit. Size, quality and form very good. Succeeds well everywhere and will undoubtedly be popular as a market variety. 25 cts. per doz., 50 cts. per 100, \$3 per 1,000.

What Our Customers Think of Our Plants, Packing, etc.

CONNECTICUT

Dear Sirs: Enclosed find money order for list of plants enclosed. I have spent some time drumming up trade here for you, as I believe you are the best men in the country in the Strawberry plant business. You give **no fancy pictures, but honest goods**. I dealt with you once and feel pleased to do so again. This is no taffy, but **facts**.
GEO. C. SPOONER.

May 11, 1900.

Dear Sirs: Received the Strawberry plants next day after shipment in fine shape. They are growing nicely. Did not lose hardly a plant. Will remember you hereafter when I want trees or plants. Respectfully yours,

H. S. MARSH.

VERMONT

Gentlemen: Strawberries received April 24, all in good order. Am much pleased with them, also with the count. Respectfully yours,

FRED. J. JOHNSON.

May 2, 1900.

MASSACHUSETTS

Gents: Please book my order for following list of Strawberry plants. * * * Am especially anxious to get these varieties **true to name**. Have ordered of you before and feel confident your plants will be O. K.

Yours, etc.,

CHAS. V. GRIGGS.

March 17, 1900.

PENNSYLVANIA

Gentlemen: I received the plants in good shape. Thanking you for your prompt response, I remain,
Your friend,

C. C. WRIGHT.

June 2, 1900.

Phoenix Raspberry.

RED RASPBERRIES

Cuthbert. Large, late. The favorite in market, the standard ; productive. 50 cts. per doz., \$1 per 100, \$8 per 1,000.

Golden Queen. A yellow Cuthbert. 50 cts. per doz., \$1 per 100.

Loudon. Did remarkably well with us when first introduced, but the past two seasons it has not equaled the old Cuthbert. 50 cts. per doz., \$2 per 100, \$12 per 1,000.

Phoenix. This seems to be a very superior early red variety, surpassing all the old varieties in size, firmness, and productiveness. As a money-maker it surpasses even Cuthbert and Loudon. 50 cts. per doz., \$1.50 per 100, \$12 per 1,000.

Shaffer (Purple). Large, rich, productive. Best of its class. Excellent for home use or canning, but soft for a market berry. 50 cts. per doz., \$2 per 100.

NEW LONDON CO., CONN., April 24, 1900.

Dear Sirs: Barrel of Raspberry plants arrived O. K. I must give you credit for knowing your business, as you saved me money by shipping by freight. The way you packed them they would have been all right for a week. Stock is first-class in every respect and count liberal.

Yours truly,

CHAS. E. CHAPMAN.

Cumberland Raspberries.

BLACK RASPBERRIES

Cumberland. Last season we fruited this grand new blackcap quite largely. We find it all the introducers claim for it. The fruit sold readily last season at an average of 3 cents per quart above Kansas, Gregg and similar varieties. The berries are very large, jet black, of finest texture and quality; quite distinct from any other variety now in general cultivation. As soon as this variety is generally known it will be largely planted. In season it is about with Kansas, but blacker and finer seeded. 50 cts. per doz., \$2 per 100, \$20 per 1,000.

Conrath. A popular, productive and hardy variety from Michigan. Similar to Kansas in size and color, and a few days earlier. 50 cts. per doz., \$1 per 100, \$8 per 1,000.

Cromwell. The earliest blackcap. Ripens its crop in a short time. Not as productive as Palmer. 50 cts. per doz., \$1 per 100.

Eureka. Similar to Conrath and Kansas in size and color, but very distinct in flavor. 50 cts. per doz., \$1.50 per 100, \$10 per 1,000.

Gregg. Too well known to need description. Not perfectly hardy, but popular in market, and often quite profitable. 50 cts. per doz., \$1.50 per 100, \$10 per 1,000.

Hilborn. Mid-season, jet black, productive and profitable. 50 cts. per doz., \$1 per 100, \$8 per 1,000.

Kansas. Large as Gregg, jet black, medium early, perfectly hardy, and of excellent quality. Plant a most vigorous grower and an abundant bearer. A very desirable, popular and profitable

variety, both for the home garden and market. 50 cts. per doz., \$1 per 100, \$8 per 1,000.

Lotta. A strong-growing variety of Gregg type. 50 cts. per doz., \$1 per 100.

Mills. A promising variety from New York state; of Gregg type, but earlier and hardier. Large, sweet and productive. 50 cts. per doz., \$1.50 per 100, \$8 per 1,000.

Munger. Of Gregg type, but said to excel that variety in size, hardiness, color, firmness, lateness, health and vigor. We are pleased with its behavior the last two seasons. 50 cts. per doz., \$2 per 100.

Nemaha. Practically identical with Gregg in fruit, but hardier in plant. 50 cts. per doz., \$1.50 per 100, \$10 per 1,000.

Palmer. The popular and profitable early market blackcap. Perfectly hardy and healthy; early, of good size and quality, and very productive of jet black berries. 50 cts. per doz., \$1 per 100, \$8 per 1,000.

Kansas Raspberries.

Mersereau Blackberries.

BLACKBERRIES

Agawam. A sweet Blackberry, about the size of Snyder. Early, hardy and productive. Does not turn red after being picked. 50 cts. per doz., \$1 per 100, \$8 per 1,000.

Eldorado. In quality finest of all cultivated Blackberries, surpassing even the old Wachusett. Fruit is of good size, early, and the canes perfectly hardy. With us it has not been very productive, but we know of fields near by, on heavier soil, where it produces bountiful crops. 50c. per doz., \$1.50 per 100, \$12 per 1,000.

Mersereau. Named by Professor Bailey, of Cornell University. He thus describes it in Cornell Bulletin, No. 99: "A variety resembling Snyder, from which it was derived. Several years ago the originator noticed an extra large, strong bush among his Snyders, and began to propagate from it. He is now changing his whole plantation to this variety. It is one of the most promising varieties I know." The points of superiority over Snyder are given as follows: "Extreme hardiness, larger size and greater

productiveness ; has less tendency to turn red after being picked, selling for 2 to 3 cents more per quart, and is of delicious quality. Its fruiting season continues into September." Not fruited here yet. \$1.50 per doz., \$10 per 100.

Minnewaski. A large late variety. Hardest of the Lawton type. Fruits until frost. 50 cts. per doz., \$1.50 per 100, \$10 per 1,000.

Rathbun. This berry fruited with us the last season, giving us the largest fruit we had. Plant gives evidence of Dewberry blood, but seems perfectly hardy. We believe it will prove profitable as a market berry. 50 cts. per doz., \$3 per 100.

Snyder. Early, hardy and productive. **The old reliable**—always to be depended on for a crop of medium-sized berries of good quality. Probably more money has been made on this variety, in this latitude, than on all others combined. 50 cts. per doz., \$1 per 100, \$7 per 1,000.

LUCRETIA DEWBERRY

Properly grown and handled, this should prove profitable. Its large size, earliness and superior quality make it a very salable market fruit. It can be grown on poor land, and one crop will pay for the land several times over. 50 cts. per doz., \$1.50 per 100, \$8 per 1,000.

CURRANTS

Two-year, No. 1 plants, 50 cts.* per doz., \$3 per 100. **One-year, No. 1, \$2 per 100.**

Cherry. The popular large red Currant of the markets. Early.

Fay's Prolific. Similar to the above, and possibly superior in length of bunch and quantity of product.

White Grape. Good quality ; productive.

GOOSEBERRIES

Two years old. Strong plants.

Downing. Large green, good quality ; productive. \$1 per doz., \$5 per 100.

Red Jacket. A strong-growing American variety. Very prolific, large fruit, excellent quality. This marks a decided forward step in Gooseberry culture. \$1 per doz., \$7 per 100.

Columbus and Pearl. Same price as Red Jacket.

Dear Sirs : The box of Blackberry plants have arrived and are all right.
Yours truly, T. S. HUBBARD Co.

Kind Friend : I am sorry we "kicked" about the price of the Snyder Blackberry. We find this was decided long ago, as thee says, but we have also decided that **thy Sneders are better than we ever got from anybody else,** and thank thee for the good stock sent. Very truly,
ISAAC C. ROGERS.

HARTFORD, CONN., June 27.

Dear Mr. Butler : The Currants, Gooseberry and other plants which you supplied me this spring I found to be excellent, and the count extraordinary.
Fraternally, G. W. SMITH.

GRAPES

Two years old. Extra strong vines

From the seventy varieties of Grapes which we have been growing, we have selected the following as varieties to be de-

pended on every season in our New England climate to furnish an abundance of fruit of desirable quality. If to be sent by mail, add five cents per vine for postage.

Brighton. The best red Grape in cultivation. Bunch and berry medium size. Superior quality. 10 cts.

Campbell's Early. A very large, promising, early black Grape, of good eating and keeping qualities. Worthy of trial. 25 cts. each.

Catawba. The old popular red Grape. Matures in sheltered locations in southern New England. 10c.

Concord. The old black favorite. Succeeds everywhere. 10c.

Delaware. A small red Grape of finest flavor. 10 cts. each.

Diamond (Moore's). Almost transparent; large, early, hardy,

sweet and juicy. One of the best Grapes. 10 cts. each.

Green Mountain. Very early, sweet and prolific. Bunch and berry medium to small in size. Color greenish white. Should be in every family collection. 25 cts. each.

Isabella. Succeeds here in sheltered locations. Finest quality and very productive. Late. 10 cts. each.

Niagara. Large, mid-season; greenish white; popular; of fair quality and quite productive. 10 cts. each.

Pocklington. Similar to Niagara in size, but a trifle yellower in color, later in season, and more foxy in flavor. 10 cts. each.

Warden. Resembles Concord. Earlier and of better quality. 10 cts. each.

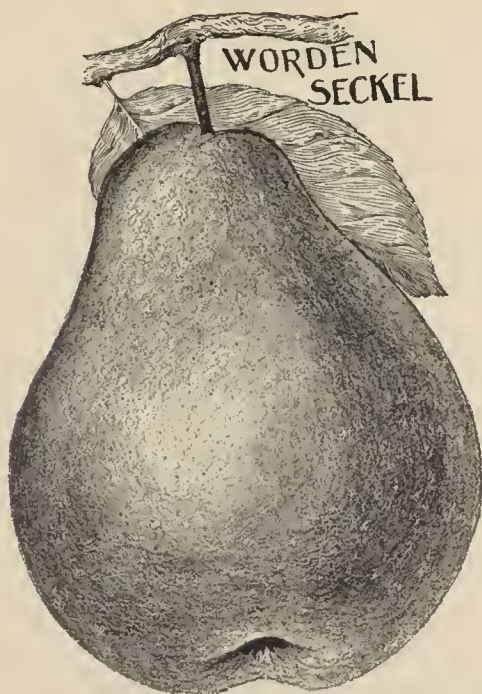

Brighton Grape.

NEW LONDON CO., CONN., Sept. 18, 1900.

Dear Sirs: All the stock I have ever bought of you has done remarkably well. The raspberries I bought last spring and my peach and plum trees, bought two years ago, are admired by all who see them, and will, I think, be the means of getting you some orders from here next spring. I will do all I can for you, anyway.

Yours truly,

CHAS. E. CHAPMAN.

STANDARD PEARS

First-class trees, 5 to 7 feet, 25 cts. each, \$2.50 per doz.

Ripening in order named.

Doyenne d'Ete, Clapp's Favorite, Bartlett, Seckel, Howell, Bosc, Sheldon, Lawrence, Anjou, Kieffer, Easter Beurre.

Worden-Seckel. A seedling of Seckel, originated by Sylvester Worden, of Worden grape fame. Mr. S. D. Willard, of Geneva, says: "I do not think there can be any mistake in calling this Pear the standard of excellence, so far as good eating Pears are concerned. When this is disseminated, the world will have a better Pear than it has ever known before." First-class trees, 50c. each.

QUINCES

Orange and Champion. First-class trees, 3½ to 5 feet, of either variety, 25 cts. each.

APPLES

First-class trees, 5 to 7 feet, 25c. each, \$2.50 per doz., \$18 per 100.

Ripening in order named.

SUMMER—Yellow Transparent, Sweet Bough, Early Harvest, Red Astrachan, Golden Sweet.

AUTUMN—Gravenstein, Porter, Maiden's Blush, Autumn Strawberry, Wealthy, Red Bietigheimer, Fall Pippin, Rolfe, Fameuse.

WINTER—Bellflower, R. I. Greening, Talman's Sweet, York Imperial, Spitzenberg, Northern Spy, Peck's Pleasant, King, McIntosh, Hubbardston, Baldwin, Wolfe River, Fallwater, Sutton Beauty, Wagner, Stark, Ben Davis, Roxbury Russet.

CRAB APPLE, Hyslop. First-class, 25 cts. each.

CHERRIES

First-class trees, 5 to 7 feet, 35 cts. each, \$3.50 per doz.

Black Tartarian. Large, rich, sweet.

Coe's Transparent. White, sweet, large.

Early Richmond. Large, red, sour.

Governor Wood. Large, sweet, red and white.

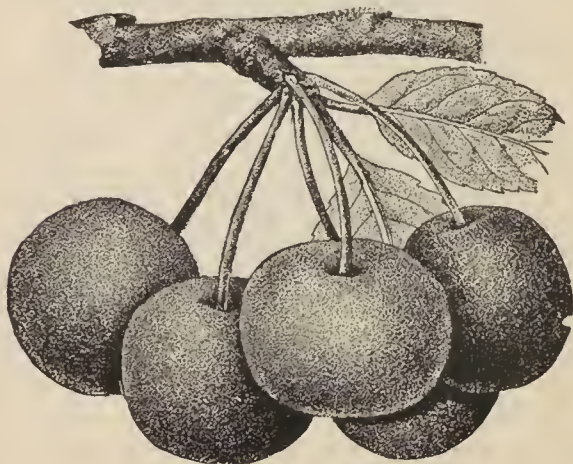

Large Montmorency. Large, red. The best sour Cherry.

Olivet. Large, red, sour. Earlier than either Richmond or Montmorency.

Schmidt's. Black, extra size and quality.

Yellow Spanish. Large, rich, excellent.

Windsor. Strong grower ; large rich, black fruit.

Windsor Cherries.

PEACHES

First-class trees, 4 to 6 feet, 15 cts. each, \$1.25 per doz., \$8 per 100; second size trees, 3 to 4 feet, 10 cts. each, \$1 per doz., \$6 per 100; third size trees, under 3 feet, \$4 per 100.

A few of the hardiest varieties of good quality, most reliable for New England, ripening in the order named. All freestones except Sneed, Alexander and Hynes' Surprise.

Sneed. The earliest Peach to ripen in Connecticut — the only claim it has on propagators.

Alexander. As handsome as a picture. Occasionally softens below the skin before rotting. Caught at this time, it is good to eat. White, wholly overlaid with red, if not shaded.

Early Rivers. White with pink cheek. The beginning of satisfactory eating in northern Peaches.

Triumph. Variable in size, homely in color, and as good to eat as it is homely to look at.

Hynes' Surprise. When we have this Peach it is delicious, of good size, and handsome. White, nearly overlaid with red. Badly subject to rot.

Carman. As large as Mountain Rose and ten days earlier. Hardy, productive, of good quality, a good shipper. White, with rosy cheek. The best recent introduction among Peaches which we have fruited.

Mountain Rose. Of finest quality; large, white with red cheek; productive and very popular in market.

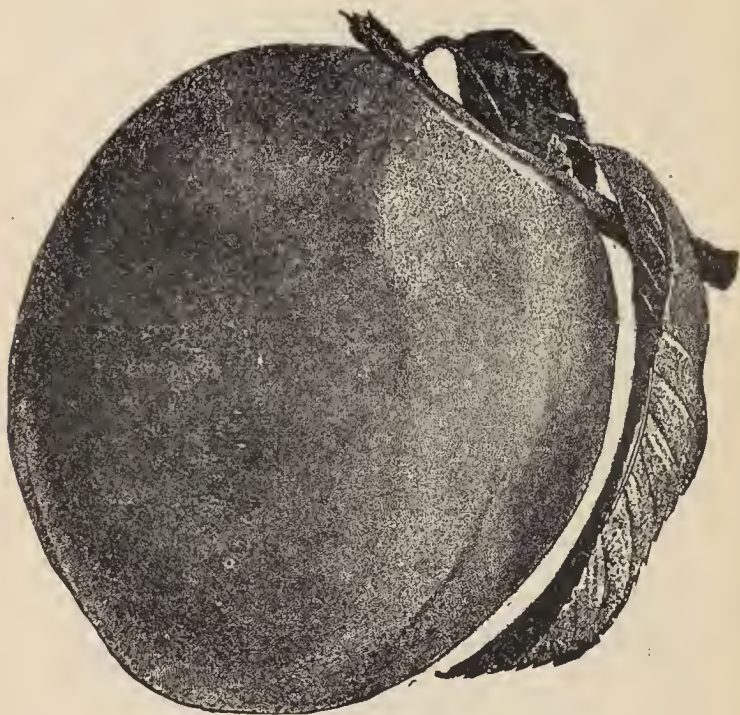

Champion. Similar to Oldmixon, but two weeks earlier; more inclined to rot and slightly inclined to cling.

Carman Peach.

MASS., April 4, 1900.

Gentlemen: Please send enclosed list of stock when season is suitable. The stock bought of you last spring was very satisfactory. **The Carman Peaches were the finest stock I ever saw.** Sorry my grounds are so nearly full.
Yours truly, L. T. HADLEY.

Elberta Peach.

PEACHES, continued

Connecticut. A large yellow Peach, ripening just ahead of Early Crawford. Very hardy, and of the best quality. Sure to become a popular local Peach, if not for general cultivation.

Fitzgerald. Of Canadian origin. Said to be large in size, of magnificent quality, very early, a splendid shipper, exceedingly hardy and productive, and a perfect freestone. Four Peaches weighed two pounds. Not fruited here yet.

Early Crawford. Very large, yellow; good quality. A very popular Peach.

Reeves' Favorite. A very large yellow Peach of finest quality. Until the introduction of Elberta, has been our most profitable yellow variety.

Foster. An extra large yellow variety, but has been inclined to rot with us, and very slightly inclined to cling.

Oldmixon. Large, white with blush cheek. Extremely productive, popular and profitable.

Elberta. This extremely large, light yellow Peach has proved a money-maker wherever planted. Of fair quality, and as a keeper it has no equal, making it very popular with the marketmen. Very hardy and productive.

Great Eastern. Large ; white, shaded with red.

Bequett Free. Large ; greenish white, clouded with red. A good market Peach.

Wheatland. Large ; yellow, blushed with red. A handsome and desirable Peach.

Chair's Choice. Large, yellow ; similar to late Crawford ; thought by some to be hardier in bud.

Emma. Same origin as Elberta, and quite similar in appearance. A trifle later and of better quality.

Late Crawford. Very large ; skin greenish yellow, with dull red cheek ; flesh yellow. One of the best and most popular.

Stump. Large, greenish white with red cheek ; of high flavor, productive, popular and profitable.

Stephen's Rareripe. Large ; white, shaded with red ; flesh white, vinous and of high quality. Hardy.

Fox Seedling. A valuable late Peach ; of good size and quality and an excellent shipper.

We recommend the first-sized tree as the most satisfactory to buy. The crop grown on one tree will often pay the extra price on one hundred.

PLUMS

EUROPEAN VARIETIES

First-class trees, 5 to 7 feet, 25 cts. each, \$2.50 per doz.

The good qualities of the Japanese varieties are fast crowding these old friends out. We offer a few of the best.

Bradshaw. Large, early, purple ; good quality. August.

Coe's Golden Drop. Large, sweet. September.

German Prune. Of medium size, purple, juicy, rich, fine. September.

Guii. Large, purple, of fair quality. September.

Lombard. Medium, red ; productive, popular. August.

Quackenboss. Large, purple. September.

Reine Claude. A fine late Plum ; green. September.

Shropshire Damson. The best Damson ; small ; purple ; popular for preserving. October.

NOT USED TO HAVING STOCK TALLY WITH DESCRIPTION

NEW JERSEY, May 2.

Dear Sirs: Your consignment of trees received in good order and promptly. Excellent trees and best of packing. A better shipment than I anticipated.

Yours truly,

L. W. HART.

JAPANESE PLUMS

All Plums are budded on Plum roots, and prices are as follows, except where noted :

First-class trees, 5 to 6 ft., 25 cts. each, \$2.50 for 12, \$18 per 100; second size, 4 to 5 ft., 20 cts. each, \$2 for 12, \$15 per 100.

These Plums are deservedly attracting much attention at present, as their quality is much better than at first supposed, and the trees are not subject to black knot. The fruit is more free from rot and suffers less from curculio than our common Plums.

We have shipped these Plums in ordinary crates as far east as Lewiston, Maine, and as far west as Urbana, Ill. All report fruit as arriving in perfect condition. Our fruit has been shipped to every state in New England, and the markets are now ready for a liberal supply. Buy your trees from those who have growing orchards, and know what varieties they are sending out. The benefit of our customers' service. Ask

practical experience is always at our questions and advice freely.

Abundance. A large, handsome Plum of superb quality. The past season it sold readily in our markets for double the price of California Plums, and easily had the preference when it became known. The fruit is a beautiful amber color, turning to a rich cherry, with a white bloom. Flesh light yellow, exceedingly tender and juicy, and very highly perfumed. Season, early August. Tree a handsome, upright grower.

Burbank. A very productive, large, handsome and popular variety. Our trees of this variety, when loaded with ripe fruit, presented the handsomest fruit picture it was ever our privilege to look upon. *The Rural New Yorker* of September 18,

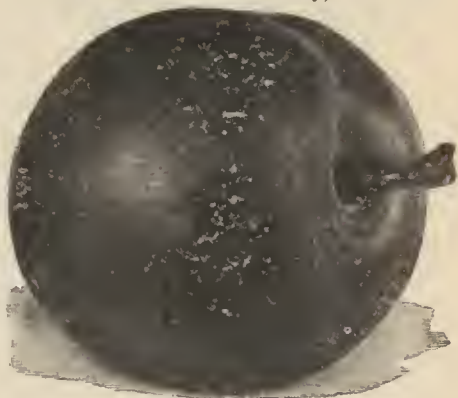

1897, says: "The handsomest Plums we have ever seen were sent to us by Butler & Jewell, nurserymen, of Cromwell, Conn.—Burbanks. They were all about the same size, and measured 6½ inches either way in circumference, being, therefore, nearly round." A trifle darker in color and firmer in flesh than Abundance.

Chabot. (Also sold under the names of Chase, Bailey, Yellow Japan, Botankio, Hattankio, O'Hattankio, Furugiya, and Orient.) Medium to large, handsome fruit, which sells readily at top prices. Comes at a convenient season for canning—September. It resembles our European Plums when canned. **An extra good keeper.** We cannot recommend this Plum too highly. We are setting trees of it by the thousand in our orchards, and we advise all who wish good Plums and good dollars to plant it liberally. Tree a handsome, upright grower. The flesh of the Plum is juicy, rich and delicious.

Hale. An extremely vigorous tree, producing fair-sized, greenish yellow Plums of superior quality. Trees have not been productive with us; may do better further south or when they are older here. Mid-August.

Georgeson (White Kelsey, Normand, Mikado, Yeddo). Fruit medium to large, yellow, with whitish bloom; flesh firm, solid and of fine quality. A long keeper. Season about with Burbank. Tree a rather better grower than Burbank, but inclined to sprawl.

Chabot Plum.

Red June (Red Nagate, Nagate No Botankio). Of medium size when well thinned; flesh yellow, cling, firm, juicy, slightly acid, of fair quality, but not rich. One of the best medium-early varieties, being hardy, productive and attractive. Tree a slow, upright grower, of very distinct type. Late July.

Satsuma (Blood Plum, Yonemomo). Fruit large when properly thinned, round-oblong with blunt point and deep suture; color dull brown-red, mottled with greenish dots; flesh hard and blood-red. Satsuma seldom becomes edible with us, but **for canning or preserving it has no equal.** We have yet to learn of a single party who has once had the fruit who did not demand it for succeeding seasons. **Always brings highest price in market.**

Wickson. Fruit very large, long, heart-shaped, with deep suture; color deep maroon-red, sometimes lighter; pit small; flesh firm and meaty, yellow, rich and aromatic, with a slight lemon flavor; cling; tree a narrow, upright grower, like Simonii. So far it has been a shy bearer with us but we look for greater productiveness as the trees increase in age. September.

NEW JAPANESE AND HYBRID VARIETIES

These, except Excelsior, Gonzales and Red May, were produced by Luther Burbank, of California. We merely repeat the descriptions as they come to us.

Only two of the varieties have fruited in Connecticut, and all need further trial before we give them our unqualified endorsement.

New Plum, "America."

America. "This giant Plum is a Robinson-Botan cross. In growth and general appearance the tree is like the American Chickasaw Plums. The fruit is larger than the average Japans and four to sixteen times as large as Robinson or Marianna. Fruit a beautiful, glossy coral-red; flesh yellow

and very delicious. Ripens two weeks before Burbank's."

□ **S. D. Willard** says of America: "One of the finest Plums I ever tasted; while its color is so attractive as to make it nearly irresistible." The tree has made a good growth here and seems hardy. 50 cts.

Apple. "Tree a very fine, strong grower, with peculiar light brown bark. The fruit, which is about $2\frac{1}{2}$ inches in diameter, is striped and mottled until nearly ripe, when it turns to a deep reddish purple. The superlatively rich, high-flavored, sweet or subacid flesh is rather firm, pale red, with streaks of pink; nearly freestone. Ripens soon after Burbank, and sometimes keeps a month or more." Its growth here is similar to Burbank's. 50 cts.

We have good reports on both America and Apple from the South this season. Should have had fruit here but for the late freeze.

"**Bartlett.** A hybrid of *Prunus Simoni* and 'Delaware,' itself one of Burbank's older crossbred Plums. (Delaware is said to be a cross between those fine Plums, Satsuma and Kelsey).

New Plum, "Apple."

"Fruit oval, conical, medium size, light yellowish crimson, with a smooth, polished, glistening skin. All the branches grow up perfectly straight, forming a dense, upright, handsome head.

"Leaves large, and as glossy as if varnished. Produces fruit abundantly the second season. The size of a large Imperial Gage, and when fresh from the tree of most delicious flavor; very far exceeding the Bartlett pear at its very best in its rich, delicious, indescribable pineapple flavor and fragrance, being exactly like the Bartlett pear in flavor, but even more delicious. Very productive; too soft for distant shipping. Originated by Luther Burbank, of Santa Rosa."

—From report of B. M. Lelong, of the California State Board of Horticulture.

Bartlett Plum.

Chalco. "A Simonii-Burbank cross. A tremendous grower of unsurpassed productiveness. Ripens before Burbank, is large, flat like a tomato, deep reddish purple; flesh very sweet, firm and fragrant. The fruits are as stemless as a peach, and completely surround the older branches, like kernels on a huge ear of corn. A superior shipping Plum, as it ripens well when picked green and keeps nearly or quite a month. Chalco is the forerunner of a new hardy race of Plums, more of which are on the way." 50 cts.

Climax. "The (1899) best selection from a great number of Simonii-Botan hybrids. Fruit heart-shaped, as large as Wickson, more highly colored, and so fragrant that a whole house is per-

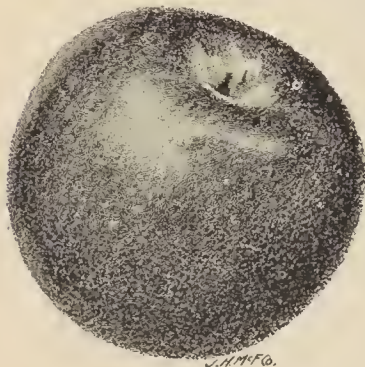

fumed by a single fruit; as delicious as could be desired, and, above all, ripens before any other good Plum. Tree extremely vigorous, of rather upright growth, with strong branches, prominent buds, and very large leaves. The very picture of hearty vigor. As productive as Burbank, with Plums four times as large and two weeks earlier."

This seems to be spread on pretty

Chalco Plum.

thick, but we have thinned it a trifle from the original. Mr. Burbank has strong commendation for Climax from Prof. Waugh, Secretary Lelong, Prof. Van Deman, S. F. Leib, Geo. H. Clayson and other prominent horticulturists. One-year trees only. 75 cts.

Gonzales Plum.

Doris. This was introduced three years ago as "of finest quality." It has not fruited here yet, but has made stocky growth and appears hardy. Possibly the fruit has been mistaken for cherries where fruited. 50 cts.

Excelsior. Origin Florida. A Kelsey-Wild Goose hybrid. Medium size, round, pointed, dark red, cling; quality very good. Not fully tested at the North. 25 cts.

Gonzales. A Texas Plum of unknown parentage, apparently a combination of Japan and Chickasaw or Wild Goose. Last season we had one Plum on a one-year tree set in 1899, and were greatly pleased with it. Season here, late August. Tree hardy and healthy, said to be wonderfully productive. Size large (about like Abundance), round, bright red, has small cling stone and agreeable flavor, and is, we should judge, a good keeper and shipper. Shall plant it largely in orchard as soon as we can propagate the trees. 1-year trees, 3 to 5 feet, \$1 each.

October Purple. Introduced in 1899 by the Messrs. Hoyt, of New Canaan. Fruited in Connecticut for the first time this season and seems to bear out Mr. Burbank's recommendation. A very large, late, reddish purple Plum of superior quality. Next to Hale has the strongest growing tree of any Japan Plum. 50 cts.

Red May. Said to be a seedling of Abundance, pollinated by Wild Goose. Ripens three weeks before Abundance. Of fair size and quality; flesh yellowish white, skin red, thick and tough. Will prove a profitable early market Plum if it proves hardy and fulfils promises made for it.

Shiro. "This handsome Plum is a tri-specific hybrid—a combination of

Shiro Plum.

Robinson, Myrobolan and Wickson, from seed of Wickson. "In foliage, growth and general appearance the tree most resembles a Myrobolan, but is a much stronger grower than any of the three from which it came; wood very hard and wiry, ripening up early.

"The fruit, which is produced in the utmost profusion, is medium to large, very uniform in size, clear light yellow, with an almost imperceptible thin white bloom. So transparent that the pit can be seen through the flesh, which is firm yet juicy—a rich, pleasant subacid clingstone. Ripens two weeks before Burbank, and is nearly or quite as productive; keeps a month or more.

"From its ancestry and general appearance it should prove of great value where it is too cold to raise most of the good Plums." 75 cts.

Sultan. "This huge, oval, deep purplish crimson fruit is generally thought by those who have tested it to be the very best, or one of the best, Plums produced.

"The flesh is remarkably firm and solid, fragrant, subacid or sweet, dark crimson, beautifully clouded and shaded with light pink, salmon and light yellow; showing in the fruit a curious combination of ancestral dynamics.

"Remarkable for the great proportion of flesh compared with the diminutive seed. The tree grows very rapidly, but is compact; has wood and leaves as much like the Napoleon cherry as like a Plum. Exceedingly productive, ripening a week before Burbank; falls like apples as soon as ripe; a great keeper."

Prof. Van Deman says, in *The Rural New-Yorker*: "Sultan is my choice of all the new Plums which I have tested. It is a cross between Wickson and Satsuma. It is large, being over two inches in diameter and nearly round in shape. The surface is smooth, dark wine-red or garnet, and very handsome. In flavor it is excellent, being tart enough, yet not sour, but a delicious subacid. No Plum that I have eaten is better, and when cooked it could scarcely be equaled. It has all the high flavor of Satsuma when cooked. The season of Sultan is at least a month earlier. The tree is very fruitful. \$1 each; 1-year trees only.

Sultan Plum.

GARDEN ROOTS

ASPARAGUS. We offer **Palmetto** and **Conover's Colossal**, first-class plants, 25 cts. per doz., 60 cts. per 100, \$4 per 1,000.

RHUBARB, Linneaus. \$1 per doz.

HORSE-RADISH. 50 cts. per doz., \$2.50 per 100.

Ornamental Department

EVERGREENS

Transplanted

Arborvitae, American. 1 foot, \$2; 2 feet, \$3; 3 feet, \$4; 4 feet, \$5; 5 feet, \$8 per doz.

Cypress, Lawson's. 2 to 3 feet. 75 cts.

Fir, Silver. 2 to 3 feet. 50 cts.

Mountain Ash. 2-year heads, 75c.

Camperdown Elm. 2-yr. heads, \$1.

Fulva pendula. 2-year heads, \$1.

Teas' Mulberry. 2-year heads, \$1.25.

Cornus (Dogwood). 2-year heads, \$1.

OTHER ORNAMENTAL TREES

Maidenhair Tree. 4 to 6 feet. 50c.

Purple-Leaved Beech. 4 to 6 ft. \$1.

Fern-Leaved Beech. 3 to 4 ft. \$1.50.

Purple-Leaved Birch. 3 to 4 ft. \$1.

Purple-Leaved Plum. 4 to 6 feet. 35 cts.

MASSACHUSETTS, April 9th.

Gentlemen: The trees and plants came promptly and in good condition. I am surprised and pleased with the quality of your stock, as well as with the prices. While I don't know where in Connecticut Cromwell is, geographically speaking, it is enough to know that is the best place for me to buy good, thrifty stock at reasonable prices, and it will be a pleasure to refer parties looking for good stock to your firm.

Very truly yours, E. C. DAVIS.

HARDY SHRUBS

A Select List of the Very Best

ALTHEAS. Double-Flowering Red, White, Purple and Blue. 3 to 4 feet. 25 cts.

ALMOND, Double-Flowering, Pink and White. 3 to 4 feet. 25 cts.

CALYCANTHUS (Sweet-Scented Shrub). Pine-apple-scented, chocolate-colored flowers. 25 cts.

DEUTZIA gracilis. Dwarf white; 1½ to 2 feet. 25 cts.

FORSYTHIA, Golden Bell. 2 to 3 feet. 25 cts.

HYDRANGEA paniculata grandiflora. 2 feet, 25c. Tree form, 3 to 4 feet, 50c.

LILAC, White and Purple. 3 to 4 feet. 25 cts.

JAPANESE TREE PEONIES. Assorted colors. \$1.

BANKSII TREE PEONY. Rosy blush. 75 cts.

SNOWBALL, Common and Japanese. 2 to 3 feet. 35 cts.

FRINGE, Purple and White. 3 to 4 feet. 50 cts.

ELAEAGNUS longipes. Yellow flowers, red fruit. 1½ to 2 feet. 25 cts.

Japan Snowball (*Viburnum plicatum*).

PLUM, Double-Flowering. 3 to 4 feet. 25 cts.

RHODODENDRONS. Hard named hybrids; 1½ to 2 feet. Scarlet, Pink, Rose, Red, White and Purple, \$1.50 each.

CLIMBING SHRUBS

AMPELOPSIS Veitchii (Japan Ivy). 2-year, strong, 35 cts.

CLEMATIS—Jackmannii (purple), Henryi (white), Paniculata (white and delightfully fragrant), Duchess of Edinburgh (double white), Graveolens (bright yellow), Madame Baron Veillard (light rose), Madame Edouard Andre (crimson), Ramona

(lavender-blue), General Grant (reddish violet). 35 cts. each.

HONEYSUCKLE—Hall's Japan, Monthly Fragrant, Chinese Twining and Scarlet Trumpet. 25 cts. each.

VIRGINIA CREEPER. 25 cts.

WISTARIA, Chinese Purple and Chinese White. 2-year, \$1.

HARDY ROSES

Strong 2-year field-grown plants of any variety, 25 cts.

A select list of the very best old and new varieties.

Allred Colomb. Carmine-crimson.
Coquette des Blancs. White;
sometimes blush.

Earl of Dufferin. Crimson-red,
shaded with dark maroon.

General Jacqueminot. Crimson.

John Hopper. Rose and car-
mine.

La France. Silvery red.

Madam Plantier. White.

Magna Charta. Pink and car-
mine.

Margaret Dickson. White;
center pale flesh.

Marshall P. Wilder. Cherry
carmine.

Mrs. John Laing. Satiny pink.

Paul Neyron. Deep rose.

Persian Yellow.

Pink Roamer. A Wichuraiana
hybrid. Single flowered.

Rosa Rugosa, or Japanese Rose.
Very large, showy, single flow-
ers on particularly attractive
bush. Red and White.

Vick's Caprice. Pink, striped
white and carmine.

Wichuraiana. Trailing. Clus-
ters of single white flowers.

Crimson Rambler.

MOSS ROSES

Crested Moss. Deep pink.

Gracilis. Deep pink.

Princess Adelaide. Pale rose.

CLIMBING ROSES

Baltimore Belle. Blush.

Empress of China. Dark red in
bud, changing to pink. Blooms
until fall.

Helene. A seedling of Crim-
son Rambler, with larger flow-
ers. Color soft violet-rose.

Little White Pet. Blooms con-
tinuously.

Queen of the Prairies. Red.

Ramblers, Yellow, White, Pink
and Crimson. The finest of
Climbing Roses.

Russell's Cottage. Dark crim-
son.

Seven Sisters. Blush.

LORD PENZANCE HYBRID SWEETBRIERS

These lovely hybrids are certainly a great acquisition. The foliage is deliciously scented like the parent Sweetbrier. The flowers are of the most beautiful tints, and produced in profusion. Hardy in most exposed situations.

Amy Robsart. Deep rose.

Anne of Geierstein. Dark crimson.

Brenda. Peach; very dainty.

Green Mantle. Bright pink, with band of white.

Lady Penzance. Soft copper; wonderful grower.

Lord Penzance. Fawn, with yellow center; sometimes toned with delicate pink.

Meg Merrilies. Crimson.

Herbaceous Peonies.

HERBACEOUS PEONIES

Large tubers, 25 cts. each

These handsome plants are absolutely hardy everywhere, have no insect enemies, and increase in beauty from year to year. We are surprised that no more of these old garden favorites are grown. The finer and newer varieties should delight everyone, as the perfection of flower and variety of color have been carried to a high degree. They are well adapted for cutting, as they are rivals of the rose, and are in accord with the present taste and style in floral decorations.

Amabilis grandiflora. White; very large, fine and sweet.

Chinensis alba. Fine large pure white flowers.

Clarissa. Rosy pink.

Compte de Jussier. Outer petals pink, inner ones yellow.

Comte de Manteuil. Dark rose; very large and double.

Dortens coros. Bright pink.

Festiva maxima. Creamy white, with small center of carmine; early; blooms in clusters.

Gloire de Donai. Deep crimson, with purplish tinge.

Grandiflora rosea. Light rose.

Humeii. Rose; full, large; late.

Noblissima. Lilac-pink, shaded darker.

Officinalis rubra. Red; early.

Papaveriflora. Outer petals pure white, inner tinged yellow.

Rosea plenissima superba. Bright rosy pink; very desirable; large and double.

Triumph du Nord. Violet-rose, with lilac shading.

Variegated. Pink and salmon.

Whitleyi. White; large.

DAHLIAS

Strong roots, 15 cts. each, \$1.50 per doz., except where noted

We have nearly four hundred distinct named varieties of Dahlias, including the newest and handsomest varieties in cultivation. We have perhaps the best assortment in Connecticut, if not in New England. We list a few of the best and most popular varieties and will quote prices on others on application.

Fern-Leaved Beauty Dahlia.

Fern-Leaved Beauty. Striped crimson and white.

Fire King. Crimson. 10 cts.

Foliis variegatis. A variegated foliage plant with handsome flowers. Foliage green margined with white; bloom a blending of white, amber and magenta. 25 cts.

Frank Smith. Variegated. 25 cts.

King of Dwarfs. Purple-maroon.

Miss Florence Shearer. Soft lilac. 25 cts.

Model of Perfection. Fine rosy lavender; free bloomer with long stems. 25 cts.

FANCY AND SHOW DAHLIAS

A. D. Livoni. Soft pink. 25 cts.

Apple Blossom. Derives its name from its color.

Arabella. Primrose, shaded lavender.

Burgundy. Purple-maroon, flamed crimson; very large.

Capt. Jack. Dark rich red.

Dandy. Dark pink, speckled and striped; sometimes solid color.

Density. Deep pink; rightly named.

Duke of Bulgaria. Bright scarlet.

Edith Connor. Rosy pink and red.

Elegans. Purplish red, tipped and banded white.

Mrs. Hodgeson. Primrose, edged purple.

Penelope. White, shaded lavender.

Peri. Creamy white, slightly shaded lavender.

Picta fulgens. Varies from red, tipped white, to white tipped red.

Psyche. Pale primrose. An ideal bedder.

Purity. White.

Queen Victoria. Yellow. 10 cts.

Ruby Queen. Ruby-red, richly shaded; profuse flowering.

Gentlemen: The Plum trees came promptly and are very fine—much better than I expected. Truly yours,

CONNECTICUT, May 2.

G. R. WARNER.

Dear Sirs: Clons received in good order. Yours truly,

STORRS, CONN., Sept. 5, 1900.

(Prof.) A. G. GULLEY.

CACTUS AND DECORATIVE DAHLIAS

Admiral Dewey. Imperial purple.

Aguinaldo. Bronze-salmon color, differing slightly from the original. 25 cts.

Black Beauty. Similar to, if not identical with, Black Prince.

Black Prince. Best of its type; maroon almost black.

Bronze Cactus. Rich flower; well named.

Clifford W. Bruton. Yellow. 25c.

Crimson Giant. Crimson, shaded maroon. Immense flowers.

Dr. Whitesides. Large and fine; white, slightly tinted. 25 cts.

Fire-Flame. Orange-buff, flamed scarlet.

Gloriosa. Deep bright red.

Grand Duke Alexis. Pure white, tinted pink. A grand and unique variety. 25 cts.

Iridescent. Odd and indescribable. 25 cts.

King of Cactus. Magenta, overlaid rosy crimson.

La Favorite. The finest pure white Cactus Dahlia to date. 25 cts.

Maid of Kent. Scarlet. 25 cts.

Marchioness of Bute. Pink. 10c.

Miss Thatcher. Light yellow.

Nymphaea. Pink.

Orange-Scarlet. Very brilliant.

Oriental. Salmon color. Large.

Pearl. White.

Red and Black. 25 cts.

Wm. Agnew. The grandest red Dahlia.

Wm. Pierce. Yellow.

Yellow A. W. Tait. Chrysanthemum form.

Zulu. Darkest maroon. 10 cts.

Type of Cactus Dahlia.

Gentlemen: I received the bulbs yesterday. They were all right.
Yours truly, MRS. H. R. HEMENWAY.

SUFFIELD, Nov. 30, 1900.

Little Dorothy Dahlia.

SINGLE DAHLIAS

Corinne. Striped yellow and scarlet, sometimes clear scarlet. An elegant variety.

Irene. White, suffused bright pink, spotted and striped deep crimson. 25 cts.

Little Dorothy. Ground rich golden straw-color, overlaid and suffused delicate pink, and spotted, penciled and striped deep,

rich crimson. Profuse bloomer, very attractive and free in bloom, 25 cts.

Novelty. Pink, spotted, penciled, and striped with dark crimson.

Paragon. Maroon.

Snow Queen. Best pure white. Exquisite.

Titan. Large; bright-orange scarlet. 25 cts.

POMPON² DAHLIAS

Allie Mourey. Pink, tipped crimson.

Catharine. Best pure yellow.

Carol. White, tinged pink. 25c.

Daybreak. Flesh-colored. One of the finest.

Eleganta. Considered the finest pink Pompon.

Fairy Queen. Light sulphur-yellow, edged deep peach. A profuse bloomer with long stems.

Guiding Star. Dwarf white; profuse bloomer. 10 cts.

Hubert. Pink, red, and maroon.

Klein Domatia. Buff-salmon.

Prince Charming. Purplish pink.

Princess Liberty. Buff and amber.

Snowclad. A favorite white.

Spring. Rich buff-yellow, shaded and tipped bright pink. Very handsome.

Teddy. White and pink.

Tom. Pale lemon.

Vivid. Deep scarlet. Exceedingly effective.

GLADIOLUS

Our fields of these beautiful flowers attracted much attention and were the admiration of visitors for weeks last summer. People came from miles away to see such a vast number of spikes in bloom at once.

We have a very fine mixture of the finest varieties, light and bright colors predominating. 35 cts. per doz., \$1.50 per 100, \$12 per 1,000.

MIXED JAPAN IRIS

Much handsomer than the German. Very fine mixture. \$1.50 per doz.

RUDBECKIA

(Golden Glow)

A beautiful, tall-growing hardy perennial, that forms a great bush of glowing golden yellow flowers. 15 cts. each, 2 for 25 cts., 6 for 50 cts.

Gladiolus.

LILIES

Good Bulbs, 25 cts. each

Auratum. Gold-Banded Japan.

Batemanni. Apricot-tinted flowers. July.

Candidum. Common white.

Double Tiger Lily.

Harrisii. Easter Lily.

Longiflorum. White; fragrant.

Speciosum album. White.

Speciosum rubrum. White, red spotted. August.

LILY-OF-THE-VALLEY

50 cts. per dozen pips

SEED POTATOES

Our Seed Potatoes are grown and wintered in Northern Aroostook County, Maine. Plant no other. The man who plants Connecticut-grown seed this season is sure to lose money on the transaction. Our Seed Potatoes are carefully grown by experienced farmers.

Carman No. 1, Carman No. 3, Early Norther, Early Rose, New Queen, Beauty of Hebron, Green Mountain and Rural New Yorker—all well known and standard varieties. 50 cts. per peck, \$1.25 per bushel, \$3 per barrel.

Ensign Bagley. A brand-new extra early white sort, introduced two years ago by S. D. Woodruff & Sons, and proving popular and profitable. 75 cts per peck, \$1.50 per bushel, \$4 per barrel.

POULTRY DEPARTMENT

Eggs for hatching from selected birds of the most profitable and popular business breeds.

Barred Plymouth Rocks (America's Business Hen)—\$1 for 13.

Rouen Ducks—With us much more hardy, satisfactory and profitable than Pekins. \$1 for 11.

Mammoth Bronze Turkeys—Fine large birds mated with heavy gobbler. \$2 for 9.

Toulouse Geese—25 cts. each.

Our fowls are in small flocks, properly mated, and have farm range.

PRUNING TOOLS

SHEARS

Full Polished French Wheel Spring (imported). The best Shears money can buy. 7-inch, \$1.25; 8-inch, \$1.50; 9-inch, \$1.75; 10-inch, \$2 per pair.

Smith's No. 5 (Spiral spring), **Taylor Pattern** (Graduated spring), **Henry Pattern** (either spring). All 8-inch japanned Shears. 50c. per pair.

Smith's No. 2 (Spiral Brass Spring), 25 cts. per pair.

PRUNERS AND PRUNING KNIVES

Levin Pruners. 50 cts. per pair.

Rockdale Pruners. Will cut an inch limb with ease. 26-inch, 75 cts.; 41-inch, \$1 per pair.

Buckeye Pruner. 24-inch, \$1 per pair.

Standard Tree Pruner. 4-foot handle, \$1; 6-foot handle, \$1.15; 8-foot handle, \$1.25; 10-foot handle, \$1.40 each.

Telegraph Pruner (without handle), \$1.50 each.

Pruning Knives. 4½-inch stag handle, \$1; 4-inch imitation stag or ebony handle, 75 cts.; 3½-inch wood handle, 60 cts. each.

NOTE.—These Pruning Knives have wide, thin blades and are made for keen cutting, not prying. If you do not know how to use a knife and want a pocket axe say so when writing, and we will have a blade made to fit your case.

Cocoa-Handle Budding Knife, 35 cts. **Ebony Handle, Bone Tip, Budding Knife,** 75 cts. **English Budding Knife,** \$2 each.

Grafting Knives. 35 cts. each.

SPRAY PUMPS

Peerless Kerosene Sprayer (Copper Tank and Brass Pump). Complete, with two leads of hose, Vermorel Nozzles and pole connections. \$35.

Weed Kerosene Sprayer. A Bucket, Knapsack and Kerosene Sprayer combined (kerosene tank detachable). Complete, \$20.

Eclipse Spray Pump. Complete, with two leads of hose, two extension rods and two double Vermorel nozzles. \$18.

Eclipse Knapsack Sprayer. \$12.

The "Out-o'-Sight" Mole Trap.

THE "OUT-O'-SIGHT" MOLE TRAP

The best Mole Trap ever offered, to which thousands will testify. It has only to be tried to be appreciated.

We know this trap is a terror to Moles. We secured one last season and have had it hanging in the packing-house ever since. Seems to cure as promptly as the sight of the dentist does a small boy with toothache.

Price \$1; postage 25 cts. Sent for \$1 if ordered with other goods.

FERTILIZERS

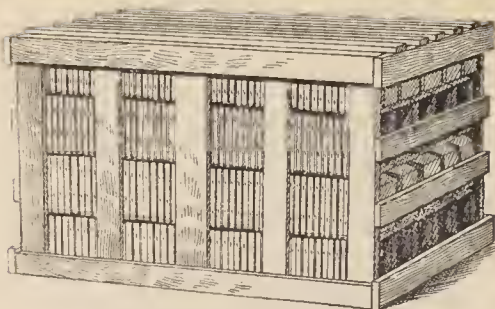

We can at all times furnish fertilizing materials in large or small quantities at market rates. Nitrate of Soda, Blood, Tankage, Bone, Acid Phosphate, Muriate of Potash, High-Grade and Double Sulphate of Potash. As market is constantly changing, write for prices on anything you need. We also supply The Rogers and Hubbard Co.'s Complete Manures for all crops—the highest grade mixed fertilizers on the market.

Dear Sirs: I received the trees April 29, in good condition, and wish I had ordered more.

NEW HAMPSHIRE, May 5.

Yours truly,

G. H. ESTEV.

1,000 Quart Baskets in a Package.

STANDARD QUART BASKETS

Our Quart Berry Baskets are made on the Cobden Stapling Machine, from selected poplar, and are bound with white birch, making the whitest, neatest and strongest basket on the market; the white birch binder is extremely tough. Baskets are seasoned before crated.

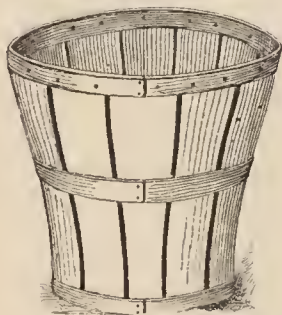

Price, \$3.50 per 1,000, \$30 per 10,000. Special price on carloads and large orders sent in early.

PEACH BASKETS

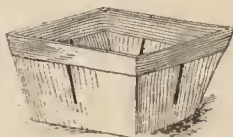

We offer the standard Peach Basket of New Jersey and Connecticut, known as the "16 quart," and holding 14 to 15 quarts.

Price, \$4.50 per 100, \$38 per 1,000. Special prices on car lots.

Pony Peach Basket. Holds about 6 quarts; same style as Standard and same price.

Board-bottom Peach Basket.

Standard Quart Basket.

Oval Pint.

OVAL PINTS

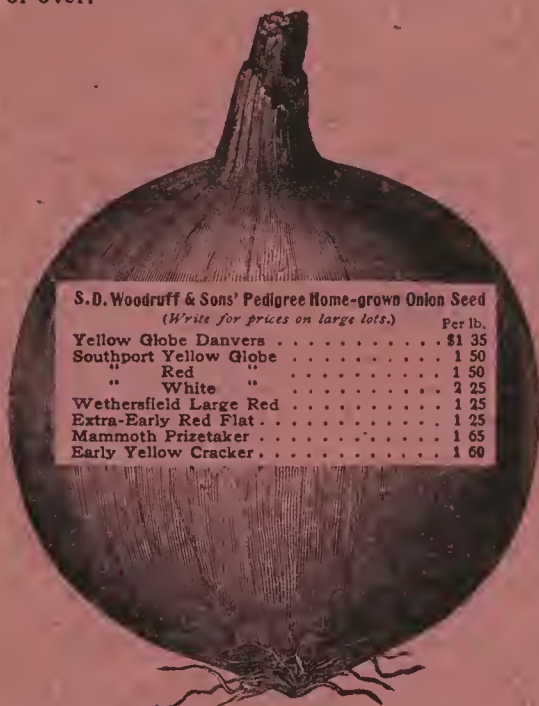

This is a very popular basket for shipping raspberries. The standard 32-quart crate can be used, sixty baskets filling a crate. This saves the buyer from an outlay for pint crates. Price, per 1,000, \$3.50.

THE BUTLER & JEWELL CO.
